DETAILED ACTION

1. Claims 1-4, 12-19 and 28-31 are pending in the application.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/27/07 has been entered.
3. Applicants' amendment, filed 3/27/07, has overcome the Elsaesser et al. 35 USC 102(b) rejection, issued in the Final Office Action dated 12/27/06.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 15, 19 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Schofield et al. {J. Chem. Soc, 1949, pp. 2393, 2396}.

The presently claimed molecular compound is disclosed by Schofield et al. {see Beilstein Registry Number 3128755}.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1621

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-4, 12-19 and 28-31 rejected under 35 U.S.C. 103(a) as being unpatentable over Elsaesser et al. {EP 0668540 A1; see English equivalent, US Pat. 5,753,405}.

Elsaesser et al. teach the presently claimed molecular compounds wherein the present variables X, A, B and R₃₅, as defined in the present formulas II through VI, are either SO₂, S, O or CO (see Formula II at the bottom of Col. 3). The difference between the presently claimed invention and what is taught by the Elsaesser et al. reference is that the scope of molecular compounds presently claimed overlaps the scope of molecular compounds taught by Elsaesser et al.

The presently claimed invention would have been obvious to one having ordinary skill in the art, in view of the Elsaesser et al. reference, because Elsaesser et al. teach molecular compounds which are encompassed by the presently claimed molecular compounds. One having ordinary skill in the art would have been motivated to obtain the small genus of phenolic derivatives, taught by Elsaesser et al. in formula II, so as to

Art Unit: 1621

use them as binders. Therefore the presently claimed molecular compounds would have been obvious to one having ordinary skill in the art.
